Community Grant Recipient
Reading and Beyond
Since Day 1
Golden 1 Credit Union

Reading and Beyond is a holistic approach to look at the families' needs and address them by working with the kids, but also working with their parents. If it is a child, the problem is their reading skills – the academic success. But, if it's the adult it is the job opportunity, the training they need to acquire. I have always held the strong belief that education is the way out of poverty. I come from that background. I understand about that and this helped me to be where I am.

These grants from Golden 1 will help advance local initiatives that will promote literacy and assist foster youth in their transition to adulthood. With the financial impact these non-profit organizations are facing, it is more important than ever to provide funding so they may help the youth succeed. It is not about us. It's about the people we serve. I'm glad to have a partner that shares that view and understanding.
